Extend Your Apple

XPANDABILITY is the Apple mi-Crocomputer's forte. You can easily add a Z-80 microprocessor with Microsoft's Softcard. And a wide variety of 80-column cards, bus expansion hardware, and other enhancement products are readily available.

One company that offers much for the Apple is Mountain Computer, Inc. (Scotts Valley, CA). Should you want to add a clock, Mountain offers two options. The first, called simply, The Clock, costs \$350, fits into any available peripheral slot on the motherboard, and has its own on-board 4-day battery to keep time when the computer is turned off. The Clock can be used for more than just keeping time. By adjusting the interrupt frequency, the interval clock can be set from 0.1 ms to 33,554,432 seconds depending on the application.

If you are short on space and need more than a clock, you might consider the CPS Multifunction card. Priced at \$239, this card contains a clock, plus serial and parallel ports. It can be configured to handle the Epson MX-80 or Diablo 630 printer, a modem, and clock functions—all at the same time.

Besides hardware, Mountain provides a series of software packages that allow using the CPS card in the Apple environment with Pascal or CP/M. And like the clock card, all you have to do is plug it in. However, the CPS card doesn't work with Computer Stop's DoubleVision 80-column card under CP/M. That's because of a software conflict that isn't easily resolvable. However, all is not lost. You can use the card easily with Sup-R-Term, or the Videx video card, and (reportedly) with Wesper Peripheral's new Whizzard-80 card.

The Expansion Chassis. With only 8 card slots, you may quickly run out of space on a basic Apple. Mountain has done something for that with the Expansion Chassis. This \$750 package allows eight more slots and is easily connected via an adapter card and cable.

The adapter card can be plugged into any slot, but three is a logical choice since it gives easy availability to a rear opening in the Apple cabinet. The expansion chassis comes with appropriate

software hints to aid in using it under software control. The chassis doesn't just augment the Apple but allows another bank of eight slots for adding peripherals. However, plug-ins like the Softcard and video cards must reside in the main Apple. In addition, when the chassis is selected (either by a frontpanel switch or software), the video card won't work, but in most cases this doesn't really cause a problem.

The expansion chassis is a good location for such products as: ROMPlus, priced at \$155; A/D + D/A card for \$350; and possibly even RAMPlus for \$189. The latter item boosts the Apple memory to 80K bytes and can reside either in the Apple itself or the expansion chassis.

Because of its unique architecture, the expansion chassis can be used with other systems that allow access to the bus signals. All that is necessary is to design a

Should you use the ROMPlus card, either in the expansion chasis or the basic Apple, there will be 12K bytes of ROM available for any home-designed applications. The chassis design supports either six 2316 or 2716 EPROMs, and can be set up so the programs are accessed when the Apple is turned on.

Interestingly, you can couple the ROMPlus with the CPS multifunction capabilities and have an automatic communication system. And, if you have an application requiring the gathering of analog data, an A/D + D/A board can be used. This board gives 16 channels on either side and can be used for spectrum analysis, remote data gathering, curve tracing, temperature sensing, and a host of other applications.

The only problem we encountered with software was with the previously mentioned conflict between the Doublevision card and CP/M. Not really a problem, but something you need to be aware of, is that the expansion chassis may cause RFI, specifically on TV channels 2 and 3. However, no other problems were noticed, and no interference to the disk or display operation was observed. The RFI source appears to be the flat cable connecting the expansion chassis to the Apple. This RFI can be

POPULAR ELECTRONICS

Netronics announces a state of the art breakthrough in terminats, now at prices you can afford, you can go on-line with data-ban and computer phone-line services. It's all yours: "electronic newspapers," educational services, Dow-Jones stock reports, games, recipes, personal computing with any level language, program exchanges, electronic but lettin boards... and more every day!!!

Netronics offers two new terminals, both ature a full 56 key/128 character typewrite

feature a full 56 keyl/128 character typewriters tyle keyboard, baud rates to 19.2 kilobaud, a rugged steel cabinet and power supply. The simplest one, FASTERM-64, is a 16 line by 64 or 32 character per line unit, with a serial printer port for making hard copy of all incoming data, and optional provisions for block and special character graphics. The "smart" version, SMARTERM-80, leatures either 24 line by 90 characters per line or 16 by 40 characters per line, it offers on-screene editing with page-atatime printing, 12,000 pixel graphics, line graphics, absolute cursor addressing, undefining, reverse video, one-half intensity and much more... simply plug them into your computer or our phone modern and be on-line instantly. Use your TV set (RF modulator required) or our delox green-phosphor monitor pictured above. For hard copy just add our matched printer.

ANNOUNCING TWO

NEW TERMINALS

Smart • Fast • Graphics • Matching Modem and \$295 Printer

Price breakthrough!!! Own the FASTERM-64, a complete terminal kit, ready to plug in for just \$199.95 or order the SMARTERM-80 kit for just \$299.95, (both available wired and tested.) Be on-line with the million-dollar computers and data services today ... we even supply the necessary subscription forms.

More good news: All the components in our terminals are available separately (see coupon), so you buy only what you need!!!

TELEPHONE MODEM 103 O/A ... FULL DUPLEX, FCC APPROVED ... DATA RATE: 300 baud ... INTERFACE: RS232/C and TTY ... CONTROLS: talk/data switch (no need to connect and disconnect phone), originate/answer switch on rear panel ... NO POWER SUPPLY RE-QUIRED.

FOR ONLY \$129.95 Learn Computing From The Ground Up

Build a Computer kit that grows with you, and can expand to 64k RAM, Microsoft BASIC, Text Editor/Assembler, Word Processor, Floppy Disks and more.

EXPLORER/85

Here's the low cost way to learn the fundamentals of computing, the all-important basics you'll need more and more as you advance in computing. Fig. 18, 1872, 3, with all the features you need to learn how to their the advanced-design Exploressing Unit 1872, 3, with all the features you need to learn how to their the ord use programs. And it can grow into a system that is a match for any personal computer on the market. Look at these features: 8085 Central Processing Unit, the microprocessor "heatt" of the Explorer/85. (Join the millions who will buy and use the 8009/8085 this year alone). . . Four 3-bit plus one 4-bit input fourtput ports from which you can input and output your programs, as well as control exterior switches, relays, lights, etc. . a cassette interface that lets you storn and reload programs you've learned to write . . . doluxe 2,000 byte operating yearend from/itor makes it easy to learn computing in grade of monitor makes it easy to learn computing in grade of monitor of the strength of the strength of the strength of programs of any point in the program of it allows tracin learning and entering of programs on a case the status of any point in the program of it allows tracin learning and the contents of the CPU (registers, flugs, etc.) on and it does much more!

You get all this in the starting level (Level A) of the explorer/81 for only 3129,95 [Incredible Tin use, just plug in your 8VDC power supply and terminal or keyboard/display — if you don't have them, see our special offers below.

Level A computer kit (Terminal Version) . . \$129,95 [us \$3 Pat.].

Level A computer kit (Terminal Version) . . \$129,95 [us \$3 Pat.].

LEVEL B — This "building block" converts the mother-board into a two-slot \$100 bus (industry standard) com-puter. Now you can plug in any of the hundreds of \$100 cords available.

arus avansone,] Level B kit...\$49.95 plus \$2 P&L.*] S100 bus connectors (two required) ... \$4.05 each,

postpaid.

LEVEL C — Add still more computing power, this "ould in block" mounts directly on the motherboard and expands

ute momerboard and expands
to \$100 hus to six slots.
□ Level C kit . . . \$39.95 plus \$2
P&L.*

□ \$100 bus connectors (five. □ required) ... \$4.85 each,

LEVEL D — When you reach the point in learning that re-quites more memory, we offer two choics: either add 4k of a memory directly on the motherboard, or add 18k 8 4kd memory by means of a single S100 card, our famous "JAWS."

| "JAWS" | Level D ik! (CHECK ONE) | ... | 4k on-hoard | \$49.98 | plus \$2 Pk!" | | 1 kk S100 "JAWS" | ... | \$149.96 plus \$2 Pk!" | | 1 kk S100 "JAWS" | ... | \$149.96 plus \$2 Pk!" | | 4kk S100 "JAWS" | ... | \$199.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$249.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | \$299.5 plus \$2 Pk!" | | 64k S100 "JAWS" | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ... | ...

LEVEL E.— An important "building block:" it activates
the #k ROM/EPROM space on the motherboard. Now just
plug in our #k Microsoft BASIC or your own custom
programs.

TEXT EDITOR ASSEMBLER — The editor/assembler is a software tool (a program) designed to simplify the task of writing programs. As your programs become longer and more complex, the assembler can save you many and the complex of the sessibility to the software includes an editor program that enters the programs you writin, makes changes, and saves the programs on cassettes. The assembler performs the clerical task of translating symbolic code into the computer-readable object code. The editor/assembler program is available either in cassette or a ROM version.

Belliot/Assembler (Cassette version; requires Level B' and Bk (min.) of RAM — we suggest 16k "IAWS" — see above). 359.85 pin. 27 Rel. ("AWS" — see above). 359.85 pin. 27 Rel. ("AWS"). 359.85 pin. 28 Rel. ("AWS"). 359.85 pin. 32 Rel. (

8" FLOPPY DISK — A remarkable "building block Add our B" floppy disk when you need faster operation

Drive Cables (sot up for two drives) ... \$25.90 plus

S. Lower Causes (set up for two drives) ... \$25.00 plus \$1.00 Pett. OPTM 2.2 Disk Operating System; includes Texts Editor/Rasembier, dynamic debugger, and other features that give your Explorer/85 access to thousands of existing CP/M-based programs ... \$31.000 postpaid.

NEED A POWER SUPPLY? Consider our AP-1. It can supply all the power you need for a fully expanded Explorer/85 (note: disk drives have their own power supply). Plus the AP-1 fits neatly into the attractive Explorer steel cabinet (see helow).

In AP-1 Power Supply kit (8V @ 5 amps) in debuxe steel cabinet ... \$33.65 plus \$2 Pett.

POPULAR ELECTRONICS

damped by wrapping the cable with aluminum foil and grounding one end. We recommend using grounded threewire power line to ensure proper system operation. We found that interference increased to where it did affect the CRT display when operating with a floating ground.

Other Software Systems. Some other software worth your attention comes from Datamost, 19273 Kenya St., Northridge, CA 91326 (213-366-7160). This software company supplies, for \$29.95 each, Thief and Snack Attack. The first is very much like the old game of Robots, but with some interesting twists—it lets you fight back. For those of you hooked on the famous arcade game Pacman, there is Snack Attack. The idea is to eat as many gumdrops as you can and avoid the guards. The action is very fast and it's a hard game to win.

Along the same line is a really classy program called Olympic Decathlon, from Microsoft Consumer Products. Based on the Olympic track-and-field events, the under-\$30 game uses both keyboard and game controls to let you try to win the Decathlon. What makes this package exciting is its full use of Apple's graphics and sound effects. Decathlon begins by presenting the Olympic rings and theme music. Then you're off after that elusive gold medal.

Should your Apple applications be more business oriented, consider Software Publishing Corporation's Personal Filing System (PFS) and Report. Both of these products are under \$100, and allow data handling as it suits you best. The PFS package lets you design a blank form and enter data in any way you desire. In addition, you can retrieve any data in the file without needing a special key file.

The Report program is similar in that you use a form that you design to specify how reported data is arranged. Unlike other report generators, Report adjusts the columns, and all you need to know is what data you want. Even if you purchase an Apple III with a hard disk, Software Publishing has PFS and Report packages available, and they promise similar support for the new 68000-based Apple expected this June.

If you're using the Z-80 Softcard, and want to expand your Apple, I recommend (for starters) the CPS Multifunction card. This card, with the associated software, gives the functions necessary to access services such as Micronet.

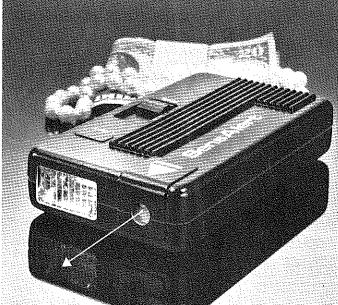

Once you've got the system configured, sign into Micronet and request the CP/MIG users' group. You'll find CP/M programs for everything from games to complex calculations. A program you'll particularly want to look for is called Bye. It has several aliases, including H89/Bye, but all versions are

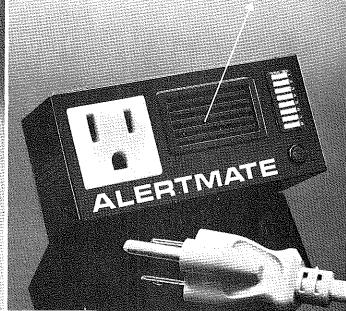

What Bye does is allow your Apple (or any other CP/Mbased machine) to be accessed from and then controlled by another system. We're currently using Bye on the Apple and other systems for this purpose, and have added XModem, which is also available on the Net. XModem is a program for uploading or downloading from a remote location.

To quickly see what's on a Micronet, run Access by typing R ACCESS. This program will tell you what's available and how to gain access. Remember that this software is public domain (i.e., free), except for the cost of using Micronet. You can reduce that time by getting SQ—the squeeze program. SQ reduces program size, thus conserving disk space and reducing

Applefest/Boston. This is the second year for the Apple-Specific Computer Show (the largest of its kind in the country, with over two hundred displays and booths plus seminars and panel discussions). It will be held May 14 to 16 at Boston's Hynes Auditorium from 11 a.m. to 6 p.m. daily. Tickets are \$6 for one day or \$15 for all three days. For information, call or write National Computer Show, 824 Boylston St., Chestnut Hill, MA 02167. 617-739-2000.
