

VIVACE! (c) 1984 by Lou Witt.
This is a Trs-80 model 4 "compiler" that supports MS-BASIC
versions 01.00.00 and 01.01.00 under TRSDOS 6.n and LSDOS 6.3.
Released as TRUST-WARE on 11/26/87. Under LS-DOS 6.3 you must
use the BASIC from TRSDOS 6.n! If you can fix this, please
upload ASAP to 8/N/1 #4 at 215/848-5728.

Mr. Witt has moved to: P.O.Box 2135 in Sanford, FL 32772-2135.
If you like/use this software a note of thanks and, maybe, \$16
should be sent to Mr. Witt. Gifts/notes to Mr. Witt may be sent
via Guy Omer at 3957 NW 9th CT in Gainesville, FL 32605.

VIVACE/CMD - SPECIAL IN-HOUSE EDITION W/O PROTECTION!
VIVACE/LIB - VERSION 3.1 (updated late 1984)
VIVACE/SCR - DOCUMENTATION in Scripsit(tm) format

PATCH (version 01/23/88) by Mike Teegarden of Sunbury, OH
to enable use of BASIC version 01.01.01 (as provide by RS
with Trsdos 6.2.1) with VIVACE compiler by Lou Witt (1984).

Name	Length	Sto	SF	Size	now	Date	Time	CRC
VIVACE.FIX	116	---	0%	116	23	Jan 88	0:22a	8f42
VIVPAT.TXT	778	Sqz	7%	724	23	Jan 88	0:22a	fa0f
Total	2	894	7%	840				

To use VIVACE under Ls-dos 6.3 you must install this PATCH
to Trsdos 6.2.1 BASIC and copy it (eg., BASIC/CMD & BASIC/OV1)
to your Ls-dos 6.3 'VIVACE system disk'. NOTE: PW=".BASIC".

PATCH FOR VIVACE BASIC COMPILER TO OPERATE UNDER BASIC 01.01.01

The Vivace compiler was developed for use under Basic 01.00.00 or
Basic 01.01.00. For those of us using Basic 01.01.01 or later, it
is an inconvenience to use the compiler. I have found a patch to fix
the problem.

NOTE: This patch is for versions of BASIC later than 01.01.00. Any
other won't work. Check to see which version of basic you are currently
using.

The patch is to the BASIC/CMD program. It re-writes the CLS command
handler so that VIVACE can directly access it. It is only one patch
line, but it does the job.

Type PATCH BASIC/CMD.BASIC VIVACE/FIX at the TRSDOS Ready Prompt.

For questions, answers, problems, please contact Mike Teegarden at:
